Health Statement for the Australian Terrier Club of America

The Board of Directors of the Australian Terrier Club of America recommends the following health screenings:

- The Australian Terrier Club of America has established health guidelines and voluntary testing recommendations for all breeding stock.
- The recommendations include OFA Eye Exam, OFA Thyroid test, and OFA Patella test (after 1 year of age).
- All testing results will be available online at Canine Health Information Center (caninehealthinfo.org).
- The Australian Terrier Club of America does recommend updates of the information every 2 years for OFA eye, and every 3 years for Thyroid and Patella.
