

BASSET HOUND CLUB OF AMERICA, INC.
AKC Member since 1937

The Basset Hound Club of America is in the process of performing a comprehensive health survey of the basset hound in order that new research priorities can be established and the club's health policy be revised.

Therefore, the current health policy of the Basset Hound Club of America is under development.

At this time the club has no recommendation for required testing but will issue a revised health policy in the near future. As the club completes its member survey work and establishes a revised health policy and set of research recommendations we will inform you immediately.
