

German Wirehaired Pointer Club of America

Although the German Wirehaired Pointer is a relatively healthy breed, the German Wirehaired Pointer Club of America (GWPCA) recommends the following health screens:

- Hip Dysplasia
 - OFA evaluation (min 24 months) - OR
 - PennHIP evaluation (min 12 months)
- Elbow Dysplasia
 - OFA Evaluation (min 24 months)
- Autoimmune thyroiditis
 - OFA evaluation from an approved laboratory - Minimum of 2 years of age, prior to breeding, and yearly thereafter until 4 years of age
- Eye Clearance
 - Results registered with OFA or CERF - any age, yearly if in a breeding program
- Congenital Cardiac Database
 - OFA evaluation - Must be by cardiologist (min 12 months)
- von Willebrand's Disease (Optional)
 - OFA Evaluation from VetGen. First Generation Offspring of tested dogs eligible for Clear By Parentage

GWPCA Board members (effective 1/1/2015) and contact information:
