The Ibizan Hound Club of the United States is dedicated to the health and welfare of the Ibizan Hound. We use guidelines for necessary testing and we strongly encourage Ibizan breeders to test for optional items. These tests are of the utmost importance to protect the future of the breed and give dogs the best chance for a healthy, long life.

When searching for Ibizan breeders, be certain to ask for documentation the sire and dam have been tested for the following:

Hip Dysplasia – OFA Evaluation or PennHIP evaluation (performed after the age of two)

Eye Examination by a boarded ACVO Ophthalmologist (CERF)

Congenital Deafness – OFA evaluation based on BAER test

Autoimmune thyroiditis – OFA evaluation from an approved laboratory (performed after the age of two)
