

In order to preserve the unique breed characteristics traits, qualities and appearance of the Komondorok, the Komondor Club of America encourages and requires the best possible high standards for their health. By adhering to our guidelines, we strive to promote and encourage breeding and showing of healthy pure-bred Komondorok.

Required Health Testing:

OFA Evaluation/Certification or PennHip Evaluation/Certification for Hip Dysplasia

Eye Evaluation by a board certified Canine Ophthalmologist and results registered with OFA or CERF

OFA Dentition and Certification by licensed veterinarian to certify full dentition

Health Electives (highly recommended):

OFA Evaluation/Certification for Elbow Dysplasia

OFA Degenerative Myelopathy DNA test

This health statement is approved by the Komondor Club of America Board of Directors
