#### American Manchester Terrier Club Health Statement

Manchester Terriers are generally a healthy breed. Like all breeds, there may be some health issues, like eye disease, auto-immune thyroiditis and von Willebrand's disease. Some dogs may be faced with these health challenges in their lives, but the majority of Manchester Terriers are healthy dogs.

#### Recommended Health Test from the National Breed Club:

- Von Willebrand's Disease DNA Test
- Ophthalmologist Exam
- Thyroid Evaluation
