

March 3, 2015

On behalf of the Board of Directors of the American Tibetan Mastiff Association, the American Tibetan Mastiff Association recommends testing dogs and bitches prior to breeding for the following:

- Hips (OFA excellent/good/fair only) or PennHip (no greater than the average for large breed dogs)
- Elbows (OFA normal)
- Biannual eye exam (OFA clear)
- Annual complete thyroid panel
